Skills

Languages: C, C++, Java, JavaScript, TypeScript, SQL

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js

Databases: PostgreSQL, MongoDB, Drizzle ORM

Tools & Platforms: Git, Docker, Postman, Vercel, Supabase

Authentication: Better Auth, JWT, Google OAuth

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Database Design

Education

Dr. D. Y. Patil Institute of Technology, Pimpri, Pune

Aug 2024 - Jun 2028

B.E. in Artificial Intelligence and Data Science

CGPA: 8.89/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Advance Data Structures and Algorithms, Artificial Intelligence, Data Science

Project Work

- **Atten-Dance:** Built a production-ready attendance analytics platform using React, TypeScript, Express.js, PostgreSQL (Supabase), Drizzle ORM, and Better Auth. Designed a normalized relational database with Semester, Subject, and AttendanceRecord entities to support scalable attendance management. Implemented secure Email/Password authentication and Google OAuth, along with attendance analytics, safe skip calculations, recovery planning, semester management, and responsive UI. Deployed the application on Vercel with a custom domain. React, TypeScript, Express.js, PostgreSQL, Drizzle ORM, Better Auth, Supabase, Vercel.
- **Investment Calculator:** Developed a financial planning web application to calculate long-term wealth creation through SIP and lump-sum investments. Implemented annual step-up contributions, inflation-adjusted returns, and combined SIP + lump-sum projections with real-time calculations. Designed an interactive interface to compare different investment strategies and visualize future portfolio growth. React, JavaScript, Financial Calculations.
- **JWT Authentication System:** Built a secure authentication system using Node.js, Express, and MongoDB with access and refresh token mechanism. Implemented user signup/login with hashed passwords and JWT-based session management. Designed token refresh flow to maintain user sessions securely while minimizing re-authentication. Applied best practices for token storage, validation, and route protection. Node.js, Express.js, MongoDB, JWT.
- **Military Sonar System (CEP):** Developed a basic sonar detection system using an ultrasonic sensor and servo motor to detect nearby objects and map surroundings. Integrated Arduino hardware with Processing IDE to visualize real-time distance data on a radar-style interface displayed on a laptop screen. Arduino, Processing IDE, Ultrasonic Sensor, Servo Motor.

Leadership & Activities

- **Social Media Manager – Zion Technical Fest, DY Patil Institute of Technology:** Created promotional content and managed social media posts for the college technical festival. Produced short-form video content that reached more than 300,000 views, helping increase visibility and engagement for the event.
- **Volunteer – My Prakriti Community Initiative:** Regularly participate in weekly plogging drives focused on environmental cleanliness by collecting waste while jogging in public spaces, contributing to community awareness about sustainable practices.
